

CLOUTH HS-1

Doctor Holder with carbon fibre top-plate for all doctor blade materials

KEY FEATURES
Top-plate with special carbon fibre construction, available in thickness of either 3 mm or 4 mm, acid and heat resistant
AISI 316L base plate with integrated pivot for the top-plate
Available with the choice of CLOUTH-AIRFLEX® 100, flexible pressure tubing or CLOUTH-AIRFLEX® 230
Fingers are available in stainless steel, aluminium or advanced polymer material, different finger profiles available
Front and rear seals from sprung stainless steel for durability

JOH. CLOUTH®
A CLOUTH GROUP MEMBER

ADVANTAGES
Quick removal of the top-plate from either side of the machine, allowing very easy cleaning of the fingers and fast tube change
Unique single tube design for loading pressure adjustment
Extended tube life due to special insulated tube slot
No flexible rubber sealings
No permanent deformation of the top-plate
Constant and even doctor blade loading pressure
Light-weight, easy mounting
Can be retrofitted
