

CLOUTH® REVICORE PRO

Doctor Blade made from high-quality recycled carbon fibre composite material

MATERIAL	
High-quality recycled carbon fibre composite material	
MATERIAL COLOR	 black
FLEXURAL STRENGTH	max. 175 N/mm ²
CONTINUOUS SERVICE TEMPERATURE	180°C
WATER ABSORPTION	< 0.5%
SURFACE ROUGHNESS	< 3 µm
CHEMICAL RESISTANCE	Common alkaline solutions, acids, oxidizing agents, solvents, oils, greases, water and steam
ABRASION RESISTANCE	Uniform due to good adaptation to the roll surface and favorable sliding properties

STANDARD DIMENSIONS	
THICKNESS mm (inch)	WIDTH mm (inch)
1.9 (0.074)	75 (3)

KEY FEATURES
Single bevel 25°
Continuous, customized length
Wear indicator
Ready for installation with matching rivet system for common holder systems
Individual geometries are possible within the scope of customer-specific solutions

APPLICATION
Designed for continuous and process-stable cleanliness during operation.
For initial cleaning or in cases of heavy deposits, the short-term use of a special cleaning blade is recommended.
